### 1 [Parallel execution of prolog programs: a survey](#)

Gopal Gupta, Enrico Pontelli, Khayri A.M. Ali, Mats Carlsson, Manuel V. Hermenegildo  
 July 2001 **ACM Transactions on Programming Languages and Systems (TOPLAS)**,  
 Volume 23 Issue 4

Publisher: ACM Press

Full text available: pdf(1.95 MB)

 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Since the early days of logic programming, researchers in the field realized the potential for exploitation of parallelism present in the execution of logic programs. Their high-level nature, the presence of nondeterminism, and their referential transparency, among other characteristics, make logic programs interesting candidates for obtaining speedups through parallel execution. At the same time, the fact that the typical applications of logic programming frequently involve irregular computation ...

### 2 [A framework for event-based software integration](#)

Daniel J. Barrett, Lori A. Clarke, Peri L. Tarr, Alexander E. Wise  
 October 1996 **ACM Transactions on Software Engineering and Methodology (TOSEM)**,  
 Volume 5 Issue 4

Publisher: ACM Press

Full text available: pdf(413.46 KB)

 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Although event-based software integration is one of the most prevalent approaches to loose integration, no consistent model for describing it exists. As a result, there is no uniform way to discuss event-based integration, compare approaches and implementations, specify new event-based approaches, or match user requirements with the capabilities of event-based integration systems. We attempt to address these shortcomings by specifying a generic framework for event-based integration ...

[Database issues for event-based middleware: Information sharing with the Oracle](#)

**database**

Deiter Gawlick, Shailendra Mishra

June 2003 **Proceedings of the 2nd international workshop on Distributed event-based systems****Publisher:** ACM PressFull text available: [pdf\(177.29 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Database systems have been designed to manage business critical information and make this information accessible on request to connected clients. There is, however, an ever-increasing need to share relevant information actively with disconnected clients and/or external systems, e.g., to propagate and/or automatically react to relevant information as soon as it becomes available. Leveraging the existing database infrastructure, Oracle created a solution to this problem. The solution is state of th ...

**4 The family of concurrent logic programming languages**

Ehud Shapiro

September 1989 **ACM Computing Surveys (CSUR)**, Volume 21 Issue 3**Publisher:** ACM PressFull text available: [pdf\(9.62 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Concurrent logic languages are high-level programming languages for parallel and distributed systems that offer a wide range of both known and novel concurrent programming techniques. Being logic programming languages, they preserve many advantages of the abstract logic programming model, including the logical reading of programs and computations, the convenience of representing data structures with logical terms and manipulating them using unification, and the amenability to metaprogrammin ...

**5 Coordination models, languages and applications: A modular approach to build structured event-based systems**

Ludger Fiege, Gero Mühl, Felix C. Gärtner

March 2002 **Proceedings of the 2002 ACM symposium on Applied computing****Publisher:** ACM PressFull text available: [pdf\(719.41 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Event-based systems are developed and used as a coordination model to integrate components in loosely coupled systems. Research and product development focused so far on efficiency issues but neglected methodological support to build such systems. In this paper, we present the modular design and implementation of an event system which supports scopes and event mappings, two new and powerful structuring methods that facilitate engineering and coordination of components in event-based systems. The ...

 [Publisher Site](#)

*Implicit invocation or publish-subscribe has become an important architectural style for large-scale system design and evolution. The publish-subscribe style facilitates developing large-scale systems by composing separately developed components because the style permits loose coupling between various components. One of the major bottlenecks in using publish-subscribe systems for very large scale systems is the efficiency of filtering incoming messages, i.e., matching of published events w ...*

## 7 Industrial papers: service oriented architectures, middleware: Event processing with an oracle database

 Bob Thome, Dieter Gawlick, Maria Pratt

June 2005 **Proceedings of the 2005 ACM SIGMOD international conference on Management of data**

**Publisher:** ACM Press

Full text available:  [pdf\(250.14 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#)

In this paper, we examine how active database technology developed over the past few years has been put to use to solve real world problems. We note how the technology had to be extended beyond the feature set originally identified in early research to meet these real-world needs, and discuss why this technology was best suited to solving these problems.

## 9 Query evaluation techniques for large databases

 Goetz Graefe

June 1993 **ACM Computing Surveys (CSUR)**, Volume 25 Issue 2

**Publisher:** ACM Press

Full text available:  [pdf\(9.37 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Database management systems will continue to manage large data volumes. Thus, efficient algorithms for accessing and manipulating large sets and sequences will be required to provide acceptable performance. The advent of object-oriented and extensible database systems will not solve this problem. On the contrary, modern data models exacerbate the problem: In order to manipulate large sets of complex objects as efficiently as today's database systems manipulate simple records, query-processi ...

## 10 Real-time volume graphics

 Klaus Engel, Markus Hadwiger, Joe M. Kniss, Aaron E. Lefohn, Christof Rezk Salama, Daniel Weiskopf

August 2004 **Proceedings of the conference on SIGGRAPH 2004 course notes**

**SIGGRAPH '04****Publisher:** ACM PressFull text available:  [pdf\(7.63 MB\)](#)Additional Information: [full citation](#), [abstract](#)

The tremendous evolution of programmable graphics hardware has made high-quality real-time volume graphics a reality. In addition to the traditional application of rendering volume data in scientific visualization, the interest in applying these techniques for real-time rendering of atmospheric phenomena and participating media such as fire, smoke, and clouds is growing rapidly. This course covers both applications in scientific visualization, e.g., medical volume data, and real-time rendering, ...

**11 The elements of nature: interactive and realistic techniques**

Oliver Deussen, David S. Ebert, Ron Fedkiw, F. Kenton Musgrave, Przemyslaw Prusinkiewicz, Doug Roble, Jos Stam, Jerry Tessendorf

August 2004 **Proceedings of the conference on SIGGRAPH 2004 course notes**

**SIGGRAPH '04****Publisher:** ACM PressFull text available:  [pdf\(17.65 MB\)](#)Additional Information: [full citation](#), [abstract](#)

This updated course on simulating natural phenomena will cover the latest research and production techniques for simulating most of the elements of nature. The presenters will provide movie production, interactive simulation, and research perspectives on the difficult task of photorealistic modeling, rendering, and animation of natural phenomena. The course offers a nice balance of the latest interactive graphics hardware-based simulation techniques and the latest physics-based simulation techni ...

Matthew Cooper, Jonathan Foote, Andreas Girgensohn, Lynn Wilcox

August 2005 **ACM Transactions on Multimedia Computing, Communications, and Applications (TOMCCAP)**, Volume 1 Issue 3

**Publisher:** ACM PressFull text available:  [pdf\(5.20 MB\)](#)Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Organizing digital photograph collections according to events such as holiday gatherings or vacations is a common practice among photographers. To support photographers in this task, we present similarity-based methods to cluster digital photos by time and image content. The approach is general and unsupervised, and makes minimal assumptions regarding the structure or statistics of the photo collection. We present several variants of an automatic unsupervised algorithm to partition a collection ...

**14 Location-based access and broadcasting: Supporting multiple subscription languages**

**by a single event notification overlay in sparse MANETs**

Katrine Stemland Skjelsvik, Anna Lekova, Vera Goebel, Ellen Munthe-Kaas, Thomas Plagemann, Norun Sanderson

June 2006 **Proceedings of the 5th ACM international workshop on Data engineering for wireless and mobile access MobiDE '06**

**Publisher:** ACM Press

Full text available:  pdf(286.10 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The subscription language is an important design decision for distributed event notification services (DENS). In order to minimize resource consumption and enable applications to use rich and complex subscription languages only when they are really needed, we have developed a DENS that separates the concerns of delivering subscriptions and notifications from the subscription specification and event filtering, i.e., the subscription language. To resolve the conflict between subscription language ...

## 15 High dynamic range imaging

Paul Debevec, Erik Reinhard, Greg Ward, Sumanta Pattanaik

August 2004 **Proceedings of the conference on SIGGRAPH 2004 course notes**  
**SIGGRAPH '04**

**Publisher:** ACM Press

Full text available:  pdf(20.22 MB) Additional Information: [full citation](#), [abstract](#)

Current display devices can display only a limited range of contrast and colors, which is one of the main reasons that most image acquisition, processing, and display techniques use no more than eight bits per color channel. This course outlines recent advances in high-dynamic-range imaging, from capture to display, that remove this restriction, thereby enabling images to represent the color gamut and dynamic range of the original scene rather than the limited subspace imposed by current monitor ...

## 16 Crowd and group animation

Daniel Thalmann, Christophe Hery, Seth Lippman, Hiromi Ono, Stephen Regelous, Douglas Sutton

August 2004 **Proceedings of the conference on SIGGRAPH 2004 course notes**  
**SIGGRAPH '04**

**Publisher:** ACM Press

Full text available:  pdf(20.19 MB) Additional Information: [full citation](#), [abstract](#)

A continuous challenge for special effects in movies is the production of realistic virtual crowds, in terms of rendering and behavior. This course will present state-of-the-art techniques and methods. The course will explain in details the different approaches to create virtual crowds: particle systems with flocking techniques using attraction and repulsion forces, copy and pasting techniques, agent-based methods. The architecture of software tools will be presented including the MASSIVE software ...

## 17 Strategies for integrating messaging and distributed object transactions

Stefan Tai, Isabelle Rouvellou

April 2000 **IFIP/ACM International Conference on Distributed systems platforms**

**Publisher:** Springer-Verlag New York, Inc.

Full text available:  pdf(460.54 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

Messaging, and distributed transactions, describe two important models for building enterprise software systems. Distributed object middleware aims to support both models by providing messaging and transaction services. But while the concept of distributed object transactions is well-understood, support for messaging in distributed object environments is still in its early stages, and not nearly as readily perceived. Integrating messaging into distributed object environments, and in particular ...

**20 Extending document management systems with user-specific active properties**

Paul Dourish, W. Keith Edwards, Anthony LaMarca, John Lamping, Karin Petersen, Michael Salisbury, Douglas B. Terry, James Thornton

April 2000 **ACM Transactions on Information Systems (TOIS)**, Volume 18 Issue 2**Publisher:** ACM PressFull text available: [pdf\(166.43 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Document properties are a compelling infrastructure on which to develop document management applications. A property-based approach avoids many of the problems of traditional hierarchical storage mechanisms, reflects document organizations meaningful to user tasks, provides a means to integrate the perspectives of multiple individuals and groups, and does this all within a uniform interaction framework. Document properties can reflect not only categorizations of documents and document use ...
